Dear Hiring Manager,

I am writing to express my interest in the **MEAN Stack Developer / Angular Frontend Developer** position. With **3+ years of experience** in developing scalable web applications and strong hands-on experience in Angular frontend development, I can build clean, responsive, and user-friendly application interfaces.

My main strength is **Angular development**, including components, reactive forms, routing, validations, Angular Material, Bootstrap, TypeScript, JavaScript, HTML5, CSS3, and REST API integration. I also have working experience with **Node.js, Express.js, MongoDB, Mongoose, Postman, Swagger, Git, and Agile/Scrum** practices.

I have worked on healthcare domain projects under the **ABDM ecosystem, including ABHA, HFR, HPR, NHCX, and EMR IP/OP** modules. I contributed to frontend workflows for health account creation, facility and professional registration, healthcare claims integration, patient registration, appointment scheduling, clinical notes, prescriptions, and discharge summaries.

In my project work, I collaborated with backend developers, QA teams, and business users to deliver milestone-based releases. I focus on writing maintainable code, creating reusable UI components, handling API integration properly, and improving overall user experience.

I am confident that my **Angular frontend expertise, MEAN stack knowledge, and healthcare project experience** will allow me to add value to your team. I would welcome the opportunity to discuss my profile further.

Thank you for your time and consideration.

Sincerely

Rakesh Dhobila
